Through its impairment program, the Board enters into a consent agreement with a licensee/certificate holder regarding impairment issues whereby the participant will maintain licensure/certification status and is allowed to practice under certain conditions. There have been recent successful completions of the program and the Board thanks these particular persons for their cooperation and wishes them much success in their continued recovery. The identities of these professionals/para-professionals and specifics with regards to these matters, as well as any other prior or pending cases with the same subject matter, are confidential and will remain so as required by law.

Please keep in mind that the Board can lawfully support the recovery and practice of those professionals/para-professionals who are cooperative and willing to help themselves (whether self-reported or reported by a third party), and still properly discharge its duty of protecting the public. If you have, or any veterinary professional/para-professional you suspect has, a problem with a controlled substance and/or alcohol, please report this to the Board office. The Board will continue to approach the matter in good faith with the hope of reciprocal cooperation to address the issue.
