

Household Pet Emergency Evacuation Training Course

This section covers guidelines for setting up and operating a pet registration and loading station at a Parish Pickup Point (PPP) or other designated evacuation area in a community. This protocol was designed to assist with the evacuation of household pets belonging to residents without means of private evacuation transportation. In Louisiana, these residents are designated as Critical Transportation Needs (CTN) population. The goal of this course is to provide the user with a standardized guideline for safe and efficient household pet evacuation, while guaranteeing that all pets are properly identified, registered and linked to their owners, thus ensuring that they can be reunited if separated.
