**"The Great Pretender: Managing and Treating Canine Hypoadrenocorticism"**  
**(Addison's Disease)**

This presentation provides a review of Canine Hypoadrenocorticism (Addison's Disease); the topics include pathophysiology, signalment, clinical signs, diagnostics, treatment, and monitoring. Cases will be discussed to reinforce your diagnostic confidence. Will include a focus on the veterinary technician's role in diagnosing and managing, as well as client communication and education.

Presented by:

**Pam Mitchell, MS, DVM**

Professional Services Veterinarian, Dechra Veterinary Products

**Dr. Mitchell** is native to New Orleans. Dr. Mitchell graduated from Louisiana State University School of Veterinary Medicine in 1992, after achieving a Master of Science and Bachelor of Science. Dr. Mitchell has experience in companion animal clinical practice in general and emergency/critical care practices, a veterinary educator in academics and the animal health industry.
