

Update on the Treatment of Hyperthyroidism in Cats

During this talk, we will discuss a few updates on the diagnosis of hyperthyroidism, and then focus on treatment. Pros and cons of treatment modalities, including potential complications, will be covered.

After the lecture, attendees should be able to determine:

What treatment modalities are an option for hyperthyroid cats?

Which treatment option is best for THIS cat?

What should I expect if I refer a cat for I-131 therapy, and what follow-up is needed?
