

Dr Sara Ramos, DVM, Diplomate, American College of Veterinary Dermatology

PROGRAM TITLE: A Review and Update on JAK/STAT Inhibitors.

PROGRAM DESCRIPTION:

JAK/STAT (Janus kinase-signal transducer and activator of transcription) is an immune pathway that is involved in various cellular processes mediating several cytokines and growth factors. This seminar will review the normal JAK/STAT pathway and how new medications that are JAK/STAT inhibitors block and alter this pathway. The focus of this seminar will be on JAK/STAT medications designed to treat Atopic dermatitis. The goal of this seminar is to provide a new sense of confidence to the attendees regarding these medications as a treatment for atopic dermatitis.

Dr David Cradic, DVM, Diplomate, American College of Veterinary Surgeons

PROGRAM TITLE: Complications and Management of Cranial Cruciate Ligament Disease

PROGRAM DESCRIPTION:

This seminar will review diagnosis of CCL disease, and the best options for surgical management. The goal of this seminar is to provide the clinician with approaches to treating CCL rupture as well as the complications that can arise.
