

These seminars are designed to give veterinary technicians an in depth review of new anesthetic techniques, general anesthetic management of large and small animal cases, refresh pharmacology of anesthetic drugs and provide an interactive environment, where technicians can directly engage with the presenter by asking questions, providing article reviews pertinent to the presenting topic, and schedule follow up review sessions.

9:00 – 10:00 am Dr. Jeannette Cremer “Anesthetic emergencies”

10:00 – 10:30 am open floor for questions
