

## Household Pet Decontamination Functional Exercise

This course is a functional exercise of setting up and operating a small animal decontamination center for community evacuees and their pets. The goal of this course is for the user to demonstrate proficient skills and real time experience for site inspection, design, set up and operations to provide safe and efficient decontamination of small companion animals during a disaster.

**The course does require completion of the LSART Small Animal Decontamination in the past 3 years.**
