

LSART Animal Emergency Plan Scenario Based Exercise

This exercise is designed to utilize and implement current response/recovery plans, protocols and procedures. This exercise will focus on Parish agencies establishing a response structure that can address numerous requests for assistance with animals affected by the disaster and also how those requests will be resourced. Non-governmental resources will also be integrated into the response structure to provide support for the various animal issues.

- The purpose of this exercise is to provide participants with an opportunity to utilize and evaluate current response plans, procedures, and capabilities in response to simulated emergencies in their parishes.
