

CE Title: Techniques for Extraction Success in the Dog and Cat

This CE will include 2 hours of lecture and a 4-hour cadaver wet lab to illustrate successful techniques in canine and feline extractions. Additionally, within the 2 hours of lecture, the attendees will also receive a refresher on how to interpret dental radiography to help them to determine when extraction is warranted in their patients as well as nerve block techniques. Attendees will not only learn proper techniques to advanced extractions, but also the appropriate equipment to use in their extraction approach.
