

OUTLINE OF PROPOSED CE ACTIVITY

DATE: May 20, 2026

TIME: 12:00PM – 1:00PM

LOCATION: LSU School of Veterinary Medicine, Room 1212B

TITLE OF PRESENTATION: Mapping Preventive Medicine Content within the DVM Curriculum using iseek.ai

SPEAKER: Led by Dr. Jack Mallard

LSU Vet Med recently purchased a new product, called iseek.ai, that allows users to use keywords or phrases to search a database of course materials across all courses within the DVM curriculum. This powerful tool allows faculty to determine where specific content is being taught within the curriculum for purposes of their lecture content creation or for curriculum alignment initiatives. During this workshop, attendees will see iseek.ai in action as we explore where certain aspects of preventive medicine are taught within Phase I and II of the curricula. Attendees will also discuss ways to strengthen preventive medicine content within the curriculum based upon the findings rendered by the iseek.ai tool and how they could use this tool in to develop their own teaching content to align with what students have covered prior to their class or will be expected to know in classes that follow theirs.
