IX. POLICY, PROCEDURE, AND RULES

A. General Update.

1. Acts enacted in the 2018 Regular Legislative Session affecting the

regulatory authority of administrative boards in general, and the Board in specific, were discussed. Implementation of the effect of applicable new laws will be instituted by Board.

2. Upcoming 2019 General Session will be a fiscal session. The issue of raising the cap on application/renewal fees required by legislative enactment was presented to the Board based on additional services being considered, such as on-line application and renewal. With a satisfactory new cap in the Practice Act, the Board can then raise the fees through rule-making procedure as needed to keep up with rising and additional costs. No action was taken.

B. Policy and Procedure.

1. Issue of active state supervision required by *NC Dental* for active market participant board was again discussed. Per new law, effective August 1, 2018, the Board will be transferred for LDH to LDAF per Act 515 of the 2018 Regular Session. No action was taken.

2. Per Act 219 of the 2018 Regular Session, effective August 1, 2018, veterinarians are now exempted from Louisiana Board of Pharmacy CDS/CE requirements earlier enacted by Act 76 of the 2017 Regular Legislative Session. By motion made, seconded and carried, the Board unanimously voted at the April 5, 2018 meeting to not enforce new Rules 403 and 1227 if a new law exempted the veterinarians. Accordingly, new Rules 403 and 1227 regarding required CDS/CE will be repealed in the next Rules changes/rule-making effort.

C. Practice Act, Rules/Related Matters/Declaratory Statements.

1. By unanimous vote of motion made by Dr. Emerson and seconded by Dr. Lipscomb, Board ratified consistently maintained policy to require licensure application to be made prior to commencement of preceptorship program.

2. The Board was contacted for a statement regarding a concern with the use of CBD Oil by veterinarians as such was represented as being illegal. However, confirmation could not be obtained due to developing authority regarding the possible legality of certain hemp, oil, extracts etc. It is the Board's further understanding that any such products would have to be tested by the governmental authority with primary jurisdiction to determine the level of THC in a given product at this time. It must be noted that the Board's administrative jurisdiction is secondary to any other governmental agency's jurisdiction/laws which are primary on CDS issues and/or criminal activity. The subject matter is an admitted legal quagmire by all interested entities at present.

In short, when a specified drug is legally permitted (clearly defined as not a crime by the proper Federal and State authorities) to be purchased/possessed/prescribed/dispensed for animals in Louisiana, then the Board would be in the jurisdictional position to determine if such was within the standard of care to be used on animals and for what

diagnoses, etc. via its administrative authority. At that time, the consideration of pertinent research regarding the efficacy of the use of a defined product for a certain diagnosed condition would be paramount prior to the exercise of any decision.

At present, per the Board's administrative jurisdiction, it has decided to not make any statement/post any notice on this subject matter, until such confusion is resolved by the governmental entities with primary jurisdiction and the results confirmed to the Board's satisfaction. Motion made by Dr. Cataldo, seconded by Dr. Corley, and passed unanimously.

3. Request from Elisabeth Ducoing regarding accepting the CHI Institute as acceptable education by the Board for her to perform acupuncture care on canines pursuant to Rule 712 (collaborative practice) under the direct supervision of a licensed veterinarian. The Board noted that the Chi Institute has been previously approved by it for continuing education. Motion made by Dr. Corley, seconded by Dr. Green, to approve the Chi Institute as an "acceptable education level" required by Rule 712. Motion was unanimously approved. It is noted that Elisabeth Ducoing, currently not licensed as a veterinarian in LA, was also advised that she cannot lawfully practice veterinary medicine as defined in the Practice Act and the Board's Rules until she first satisfies the criteria required for licensure and the issuance of such a license by the Board. The Board also stated its concern as to how a DVM may practically limit her skills to only the provision of acupuncture to a patient; however, such is the challenge she and her supervising veterinarian may face. The Board will hold her, as well as her supervising veterinarian, accountable for compliance with Rule 712's standards.

4. Information received from Malcolm Broussard with the LA Board of Pharmacy regarding a query/comment it received from Dr. Bruce Guillory addressing his concerns about pharmacists needing education/training on medications prescribed by veterinarians for animals. The LVMA was sent a copy of Broussard's email communication. The issue was added to The Pharmacy Board's meeting agenda for May 23, 2018. Dr. Guillory submits he cannot be present at the meeting. This matter is more in the nature of the professional association's business. No action was taken.

5. Inquiry from Dr. Carol Duplechain regarding if it is legal and ethical to allow outside companies like Idexx, Merial Rewards, Greenline Pet to gain access to client files for the purpose of sending coupons, redeeming coupons, and providing reminder cards. The Board earlier answered her question, and this time reasserted that since its February 17, 2012 decision, the Board maintains the same response to the question it provided at that time. There has been no change in the legal authority nor the facts/scenario as described. In short, Board Rule 1041 clearly states that "a licensed veterinarian shall not violate the confidential relationship between himself and his client." The confidential relationship by its very nature includes the names of the clients and patients, and their contact information, or the client list/files

which are reflected in her question.

6. Dr. Monique Matherne presented a “proposed consent form” she would like to use on all new clients giving her consent to share their pet's information with governing bodies, grooming and boarding facilities, and other DVM offices that request paperwork. Dr. Matherne was informed that neither the Board, nor its attorney, can provide advisory opinions regarding the legality and effectiveness of any submitted proposed consent form to be used. It was suggested that she confer with her private attorney on the legality and effect of such a form. With that stated, informed consent in writing and signed by the client is always preferable to verbal format from an evidentiary standpoint. A concern might arise over the validity of a document presented generally to all clients as a routine protocol. The legal and ethical obligations which exist for a veterinarian to protect the privacy of the client-patient, including maintaining the confidentiality of medical records and information, was also highlighted in the response to Dr. Matherne
